## ABOUT ME

---

I'm someone driven by passion and determination rather than just technical knowledge. I'm deeply passionate about software development and everything related to technology.

I'm looking to grow as a developer who constantly pushes boundaries, improving not just my technical skills, but my life overall. I'm seeking new challenges and goals that push me to be my best self every day.

## EXPERIENCE

---

### Full Stack Developer

*Programmed Prodrome*

Argentina

2021-Present

- Design, build, and integrate RESTful APIs ensuring scalability, security, and maintainability.
- Diagnose and resolve complex technical issues to ensure system reliability and optimal performance.
- Collaborate with cross-functional teams to deliver quality code and meet project deadlines.
- Develop and maintain web applications using modern frameworks and best practices.
- Participate in code reviews and contribute to improving development processes.
- Create and maintain microservices using clean architecture.
- DevOps setup for every repo , including testing, (Docker), CI/CD (Circles), and code coverage monitoring.
